SACHIN PATIL

Java Backend Developer

BTM Layout, Bengaluru, Karnataka | 8722680182 | sachinpatil272003@mail.com

LinkedIn: linkedin.com/in/sachin-patil-55865a366 | GitHub: https://github.com/Me-sachin123

OBJECTIVE

Highly motivated MCA graduate (CGPA 9.25) with a strong foundation in Java backend development, seeking a Java Backend Developer role — internship or full-time — to apply skills in Spring Boot, Hibernate, JPA, and database design to build reliable, scalable applications.

EDUCATION

Master of Computer Applications (MCA) — Basaveshwara Engineering College, Bagalkot (VTU) 2026 | CGPA: 9.25

Bachelor of Computer Applications (BCA) — SJPN Trust's BCA College, Nidasoshi 2024 | CGPA: 7.49

EXPERIENCE

Java Full Stack Intern | QSpiders (Test Yantra Software Solutions India Pvt. Ltd.) Feb 2026 – Jun 2026

- Trained in Core Java fundamentals — OOP principles, Collections framework (List, Set, Map), Multithreading, and Exception Handling — for writing robust, maintainable code.
- Worked with JDBC to connect Java applications to relational databases and perform CRUD operations.
- Applied Hibernate, Spring, Spring Boot, and JPA to build backend features — including ORM mapping, dependency injection, and REST-style service design.
- Worked under industry mentorship on real-world backend development workflows and coding practices.

Power BI Developer Intern | Simdaa Technologies Pvt. Ltd., Pune (offline) Mar 2024 – May 2024

- Developed interactive Power BI dashboards to visualize sales data and key business metrics.
- Designed SQL tables, data models, and queries, and integrated SQL Server for real-time data access and reporting.
- Gained early industry exposure to software development practices and team workflows.

PROJECTS

Fertilizer Shop Application | *Java 17, Spring Boot 3, Spring Security, JPA, MySQL*

- Built a full-stack e-commerce app with separate admin and customer portals — product CRUD, cart, checkout, and order-status tracking (Pending → Confirmed → Shipped → Delivered).
- Implemented role-based access control (Admin/Customer) with Spring Security, BCrypt password hashing, and CSRF protection.
- Designed relational schema across Users, Products, Orders, and OrderItems using Spring Data JPA with MySQL.
- GitHub: https://github.com/Me-sachin123/AgriCart

API Rate Limiter & Usage Metering Gateway | *Java 17, Spring Boot, Spring Security, JPA, MySQL, React*

- Built a Spring Boot gateway enforcing per-client, plan-based (Free/Pro/Enterprise) API rate limiting using two interchangeable algorithms — Token Bucket and Fixed Window.
- Designed a custom API key authentication scheme (SHA-256 hashed secrets) for clients and JWT-based auth for admin access, with 429 responses carrying standard X-RateLimit-* headers.
- Logged every request to power a React usage dashboard, letting clients track their own quota and admins monitor usage across all clients.
- GitHub: https://github.com/Me-sachin123/api-rate-limiter

Budget Analysis Dashboard | *SQL Server, Power BI*

- Built an interactive single-page dashboard visualizing budget data through charts and graphs for data-driven reporting.

TECHNICAL SKILLS

Languages: Java (Core, Collections, Multithreading, Exception Handling)
Backend: Spring, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, JDBC
Database: MySQL, SQL Server
Frontend: HTML, CSS, JavaScript
Tools: Maven, Git, Power BI

CERTIFICATIONS

- Java Full Stack Development — QSpiders (Test Yantra Software Solutions India Pvt. Ltd.)
- NPTEL — Research Methodology
